

Envirosearch Residential

Risk Summary

Section 1: Contaminated Land

PASSED

We consider there to be no potential risk of contaminated land at or within the vicinity of the property. Please **refer to section 1** for further information.

Section 2: Flood

NONE IDENTIFIED

While this report may have identified areas at risk of flooding within 250m of the search centre, we consider there to be no significant risk of flooding to the property. Please **refer to section 2** for further information.

Section 3: Energy & Infrastructure

IDENTIFIED

We have identified one or more factors such as HS2, Crossrail 1 and 2, energy exploration, wind or solar farms within the vicinity of the property. Please **refer to section 3** for further information and next steps.

Section 4: Ground Stability

IDENTIFIED

We have identified a factor that may affect the ground stability of the property. Please **refer to section 4** for further information and next steps.

Section 5: Radon

IDENTIFIED

We have identified that the property falls within a radon affected area. Please **refer to section 5** for further information and next steps.

Section 6: Other Influential Factors

NONE IDENTIFIED

No overhead power lines, environmental or other influential factors have been identified within the vicinity of the property. Please **refer to section 6** for more information.

This report is issued for the property described as

Landmark Contribution

By purchasing this report, the recipient may be eligible for remediation contribution of **up to £150,000** if served with a Remediation Notice by the local authority. Such a notice may require the homeowner to pay for all, or contribute to, the remediation of the property. For more information see Landmark's Terms and Conditions.

Conveyancer Guidance

Professional Opinion

Contamination Risk: **PASSED CERTIFICATE**

In the professional opinion of Argyll Environmental Ltd. the level of contamination risk associated with the information disclosed in the Envirosearch Residential report dated 24th February 2020 and reference 235702259_1_1, ESR Passed Sample_ESR for

Sample Site

1) is unlikely that the property would be designated "contaminated land" within the meaning of Part 2A of the Environmental Protection Act 1990.

2) is unlikely to have an adverse effect on the security of the property for normal lending purposes.

The professional opinion refers to Section 1 of this report and should always be read in conjunction with the full text of that report. No physical site inspection or survey has been carried out or is proposed.

Approved by:

Argyll Environmental Ltd

Summary of Report Findings

Section 1: Contaminated Land

Contamination Risk	0-25m	25-250m	250-500m	See Section
Designated Contaminated Land	No	No	No	1a
Landfill and Waste	No	Yes	No	1b
Potentially Contaminative Activities	No	No	No	1c
Known Contamination Incidents	No	No	No	1d
Other Potential Contaminative Land Uses	No	Yes	n/a	1e

Overhead Power Lines	No	6a
Environmental Constraints	No	6b

Property Purchaser Guidance

Understanding This Report

The purpose of this report is to highlight any potential risk of contaminated land and identify other environmental factors at or around the property. It is necessary for your solicitor to consider these risks as part of their due diligence.

For Contaminated Land, we will state '**Passed**' on the front page if our expert consultants have considered there to be no potential risk. If a potential risk of contamination is found, the report will state '**Further Action**'. In this case, we include a 'Next Steps' section to help you to decide what to do next.

For all other environmental factors, we will state '**None Identified**' on the front page if we consider there is little or no significant risk to the property. If a potential risk is found, we will state '**Identified**' and detail the Next Steps within the relevant section of the report.

Section 1: Contaminated Land

In this section, we highlight on a map, and within our findings pages, if there are any potential contaminated land risks at or around the property. Contaminated land contains substances that are actually or potentially hazardous to health or the environment.

Section 2: Flood

In this section, we detail any risks of flooding at or around the property. We consider a number of factors such as river, coastal, groundwater and surface water.

Section 3: Energy & Infrastructure

In this section, we provide information on a variety of energy and infrastructure projects and developments which may affect the property and surrounding area, such as High Speed Rail (HS2), Crossrail 1 and 2, solar and wind farms, etc. (only wind and solar farms with a capacity to produce over 1MW of power are shown).

Section 4: Ground Stability

In this section, we identify if there are any factors present which could affect the ground stability of the property, such as coal mining activities, man-made or natural cavities.

Section 5: Radon

In this section, we identify if the property is located in a radon affected area. Radon is a radioactive gas, which occurs naturally in rocks and soils and may be harmful to health.

Section 6: Other Influential Factors

In this section, we identify factors that may have an influence on the property or surrounding area, such as overhead power lines or any environmental constraints such as national parks or conservation areas.

Next Steps:

If you require any assistance, please contact our customer service team on: **0844 844 9966** or **helpdesk@landmark.co.uk**

Site Location

Aerial Photograph

The photograph below shows the location of the property.

Section 1a and 1b: Contaminated Land, Landfill and Waste

The map below shows the location of the Designated Contaminated Land and Landfill and Waste features highlighted within sections 1a and 1b of this report. Further details are shown on the following pages.

- Environmental Permitting Regulations - Waste
- Integrated Pollution Control Registered Waste Sites
- Registered Waste Treatment or Disposal Sites
- Registered Waste Transfer Sites

Section 1a: Designated Contaminated Land

The data within this section tells you whether your property or surrounding area has been identified by the Local Authority as "Contaminated Land" under the Environmental Protection Act 1990. Should there be an indication of contamination, it is not necessarily a cause for concern. Your report will be assessed by our professional environmental consultants who will advise you what, if any, considerations need to be made should you proceed with the property purchase.

Enquiry	Result
Has any contaminated land been identified within 500m of the property?	No

Map ID	Reference	Location	Details	Distance	Contact
Contaminated Land Register Entries and Notices					
No factors identified for this property					

Section 1b: Landfill and Waste

The information in this section is telling you about active and historic landfill and waste sites within 500 metres of the property. Having a landfill or waste site near your property does not necessarily mean that you or the property will be affected. However, it is something you need to be aware of, because landfill and waste can have a detrimental effect on the surrounding environment, house value and health. A closed landfill/waste site should be given equal consideration to an active site, because of landfill by-products. For instance, landfill with lots of organic material can continue to produce odours and gas for many years.

Enquiry	Result
Have any landfill and waste sites been identified within 500m of the property?	Yes

Section 1c: Potentially Contaminative Activities

This section describes current and historic licensed activities within 500 metres of the property, which have the potential to cause contamination or have an impact on the environment. The licensed activities could range from pollution to air, land or water; storage or disposal of radioactive substances; or storage of hazardous or explosive materials. Licences may no longer be active, but the nature of the past activity means it could still have an impact.

Enquiry	Result
Have any potentially contaminative activities been identified within 500m of the property?	No

Section 1e: Other Potential Contaminative Land Uses

This section describes either current or historic activity, which could be considered to be contaminative. This section makes no statement about whether the activity requires a licence; however our environmental experts deem that the activities described in this section could lead to potential contamination. The information is taken from a variety of sources including trade directories, Landmark's extensive historical map collection and analysis of historic activity. Records are highlighted due to the potential for contamination to exist.

Enquiry	Result
Have any other potential sources of contamination been identified within 250m of the property?	Yes

Next Steps

If you would like any further information in respect of the above findings we recommend that you contact our Customer Services Team, whose details can be found in the 'Useful Contacts' section of this report. Further Information is also available in the 'Useful Information' section.

Section 2a and 2b: River and Coastal Flooding

The map below shows the location of potential river and coastal flood risk. The potential risk has been modelled on the basis of events with a 1 in 75, 200 or 1000 chance of occurring in any given year. Further details are shown on the following pages.

Contains Ordnance Survey data © Crown copyright and database right 2020

River Flooding

Coastal Flooding

Section 2c: Surface Water Flooding

The map below shows the location of potential surface water flood risk. The potential risk has been modelled on the basis of events with a 1 in 75, 200 or 1000 chance of occurring in any given year. Further details are shown on the following pages.

Contains Ordnance Survey data © Crown copyright and database right 2020

Surface Water Flooding

Section 2a: River Flooding

River flooding mainly happens when the river catchment (that is the area of land that feeds water into the river and the streams that flow into the main river) receives greater than usual amounts of water (for example through rainfall or melting of snow). The amount of runoff depends on the soil type, catchment steepness, drainage characteristics, agriculture and urbanisation as well as the saturation of the catchment. The extra water causes the level of the water in the river to rise above its banks or retaining structures. The result is a worst-case scenario and assumes the failure of any defences which may be present.

Enquiry	Result	Contact
Is there a potential risk of river flooding within 250m of the property?	No	-

Section 2b: Coastal Flooding

Coastal flooding is the inundation of land caused by sea water rising above normal tidal conditions due to the effects of severe weather conditions (a combination of storm surge, tides and river inflow). The result is a worst-case scenario and assumes the failure of any defences which may be present.

Enquiry	Result	Contact
Is there a potential risk of coastal flooding within 250m of the property?	No	-

Section 2c: Surface Water Flooding

Surface water flooding results from rainfall running over ground before entering a watercourse or sewer. It is usually associated with high intensity rainfall events (typically greater than 30mm per hour) but can also occur with lower intensity rainfall or melting snow where the ground is already saturated, frozen, developed (for example in an urban setting) or otherwise has low permeability.

Enquiry	Result	Contact
Is there a potential risk of surface water flooding within 250m of the property?	Yes	-

Next Steps

If you wish to gain more detailed information on the type and likelihood of your property being impacted by a flood event and the potential impact on insurance, we recommend that you purchase our Landmark Flood Report. If you would like more information please contact your Search Provider or our Customer Services Team on **0844 844 9966** or email helpdesk@landmark.co.uk.

Flood data provided by JBA Risk Management Limited. © Copyright JBA Risk Management Limited 2008-2020.

Section 2d and 2e: RoFRS and Historic Flood Events

The map below shows the location of RoFRS and Historic Flood Events. Further details are shown on the following pages.

Contains Ordnance Survey data © Crown copyright and database right 2020

Risk of Flooding from Rivers and Sea (RoFRS)

Historic Flood Events

Section 2d: Risk of Flooding from Rivers and Sea (RoFRS)

The Risk of Flooding from Rivers and Sea (RoFRS) database provides an indication of river and coastal flood risk at a national level using a 50m grid as used by many insurance companies. The RoFRS data product has been created by calculating the actual likelihood of flooding to areas of land within the flood plain of an extreme flood and considers the probability that the flood defences will overtop or breach. The risk level is divided into four categories 'Low', 'Medium', 'High', and 'Very Low'.

Enquiry	Result
Is there a risk of flooding identified within 250m of the property based on the Risk of Flooding from Rivers and Sea (RoFRS)?	No

Map ID	Reference	Location	Details	Distance	Contact
Risk of Flooding from Rivers and Sea (RoFRS)					
No Risk Found					

Section 2e: Historic Flood Events

The Historic Flood Events shows the individual areas of all historic flood events recorded by the relevant agency. This information is a useful tool to identify homes and businesses that may have experienced flood problems in the past. An area affected by a historic flood event may now be protected through an increase in flood management schemes and defences, meaning that it may not necessarily flood again. Equally the absence of a historic flood event does not mean that flooding has never occurred in an area, but that the agency do not have a record of it.

Enquiry	Result
Have any Historic Flood Events occurred within 250m of the property?	No

Map ID	Reference	Location	Details	Distance	Contact
Historic Flood Events					
No Events Found					

Section 2f: Groundwater Flooding

Enquiry	Result	Contact
What is the risk of Groundwater Flooding within 250m of the property?	Low	2

Comment: There is a low risk of groundwater flooding in this area with a chance of greater than 1% annual probability of occurrence. For sensitive land uses further consideration of site topography, drainage, and historical information on flooding in the local area should be undertaken by a suitably qualified professional.

Next Steps

If you wish to gain more detailed information on the type and likelihood of your property being impacted by a flood event and the potential impact on insurance, we recommend that you purchase our Landmark Flood Report.

If you would like more information please contact your Search Provider or our Customer Services Team on **0844 844 9966** or email helpdesk@landmark.co.uk.

Section 3a: New Rail Infrastructure

High Speed Rail Link and Crossrail 1 and 2 are new rail links proximity to which is likely to have an impact on surrounding areas

Enquiry	Result
Is the property within 4km of the proposed HS2 rail development?	No
Is the property within 2km of the proposed Crossrail 1 or 2 rail developments?	No

Section 3b: Oil and Gas Exploration and Production

Any areas to be explored for their energy potential by the oil & gas industry must be licensed by the Oil and Gas Authority. Such exploration includes areas subject to hydraulic fracturing ("fracking") investigation.

Enquiry	Result
Is the property within 4km of an area licensed for onshore energy exploration and production?	Yes
Is the property within 4km of an area that has been offered for licensing for the onshore exploration oil and gas by the Oil and Gas Authority?	No
Is the property within 4km of a well used for energy exploration or extraction?	No

Section 3c: Existing or Proposed Wind Farms and Wind Turbines

Wind energy is one of several alternative energy sources; however, the location of wind farms or turbines can be contentious due to visual and auditory impact on the surrounding area. The information in this section gives insight into whether there are wind farms or turbines (planned or existing) in the vicinity of the report location. Planning Applications showing a "Planning Application Refused" status are reported as active as they can be resubmitted or appealed until Planning Permission has expired, or they are withdrawn or abandoned by the Applicant. We detail only those wind power developments which generate between 1MW and 50MW of power.

Enquiry	Result
Is the property within 4km of existing or proposed wind farms or wind turbines?	No

Section 3d: Existing or Proposed Solar Farms

Solar energy is one of several alternative energy sources; however, the location of a solar farm can be contentious due to its visual impact on the surrounding area. The information in this section gives insight into whether there are solar farms (planned or existing) in the vicinity of the report location. Planning Applications showing a "Planning Application Refused" status are reported as active as they can be resubmitted or appealed until Planning Permission has expired, or they are withdrawn or abandoned by the Applicant. We detail only those solar developments which generate between 1MW and 50MW of power.

Enquiry	Result
Is the property within 2km of existing or proposed solar farms?	Yes

Next Steps

In order to gain more detailed information regarding the potential impact of HS2, Crossrail 1 and 2, Energy Production, Wind Farms or Solar Farms on your property we recommend that you purchase an Argyll Energy & Infrastructure report. If you would like more information please contact your Search Provider or our Customer Services Team on **0844 844 9966** or email helpdesk@landmark.co.uk.

Section 4a: Man-Made Factors

Enquiry	Result	Contact
Is the property within 25m of a Coal Mining Affected Area?	No	-
What is the potential for ground instability relating to non-coal mining within 50m of the property?	Rare	3
<p>Comment: The British Geological Survey has assessed that hazards because of underground non-coal mine workings in this area are rare. It should be noted that there is always the possibility of excavations that are outside of the scope of this dataset which could affect ground stability.</p>		
Are there any Man-Made mining cavities within 250m of the property?	No	-

Section 4b: Natural Factors

Enquiry	Result	Contact
Are there any Natural cavities within 250m of the property?	No	-
What is the potential for natural ground instability in the area within 50m of the property?	High	3
<p>Comment: The British Geological Survey has assessed the area of search as having high potential for natural ground instability. This does not necessarily mean there is cause for concern in terms of the property's stability. Active subsidence will be dependent on local conditions, such as the proximity of trees or areas where trees have been removed, which require an inspection of the site to identify the nature of the ground on which the property is built. A house buyers survey is advised to look for signs of property damage that may indicate poor natural ground conditions.</p>		

Next Steps

This section has highlighted that ground stability is an area of concern, meaning that your property may be affected by subsidence or land-heave. If you would like any further information in respect of the above findings we recommend that you purchase our Homecheck Mining and Subsidence Report. Please contact your Search Provider or our Customer Services Team on **0844 844 9966** or email helpdesk@landmark.co.uk.

Section 5: Radon Findings

The information within this section tells you whether the property is located in a radon affected area. Radon is a radioactive gas which occurs naturally in rocks and soils. You cannot see, hear, feel or taste it. Exposure to particularly high levels of radon may increase the risk of developing lung cancer, and is therefore something you need to be aware of.

Enquiry	Result	Contact
Is the property in a radon affected area?	The property is in a radon affected area, as between 1 and 3% of homes are above the action level	4
What level of radon protection measures for new dwellings or extensions to existing ones is required for the property?	No radon protective measures are necessary in the construction of new dwellings or extensions	4

Next Steps

The level of radon concentration can only be established by having the building tested. Action should be taken if the indoor radon level is measured and found to be above 200 becquerel's per cubic meter. If you would like any further information we recommend you contact Public Health England, whose details can be found in the 'Useful Contacts' section of this report.

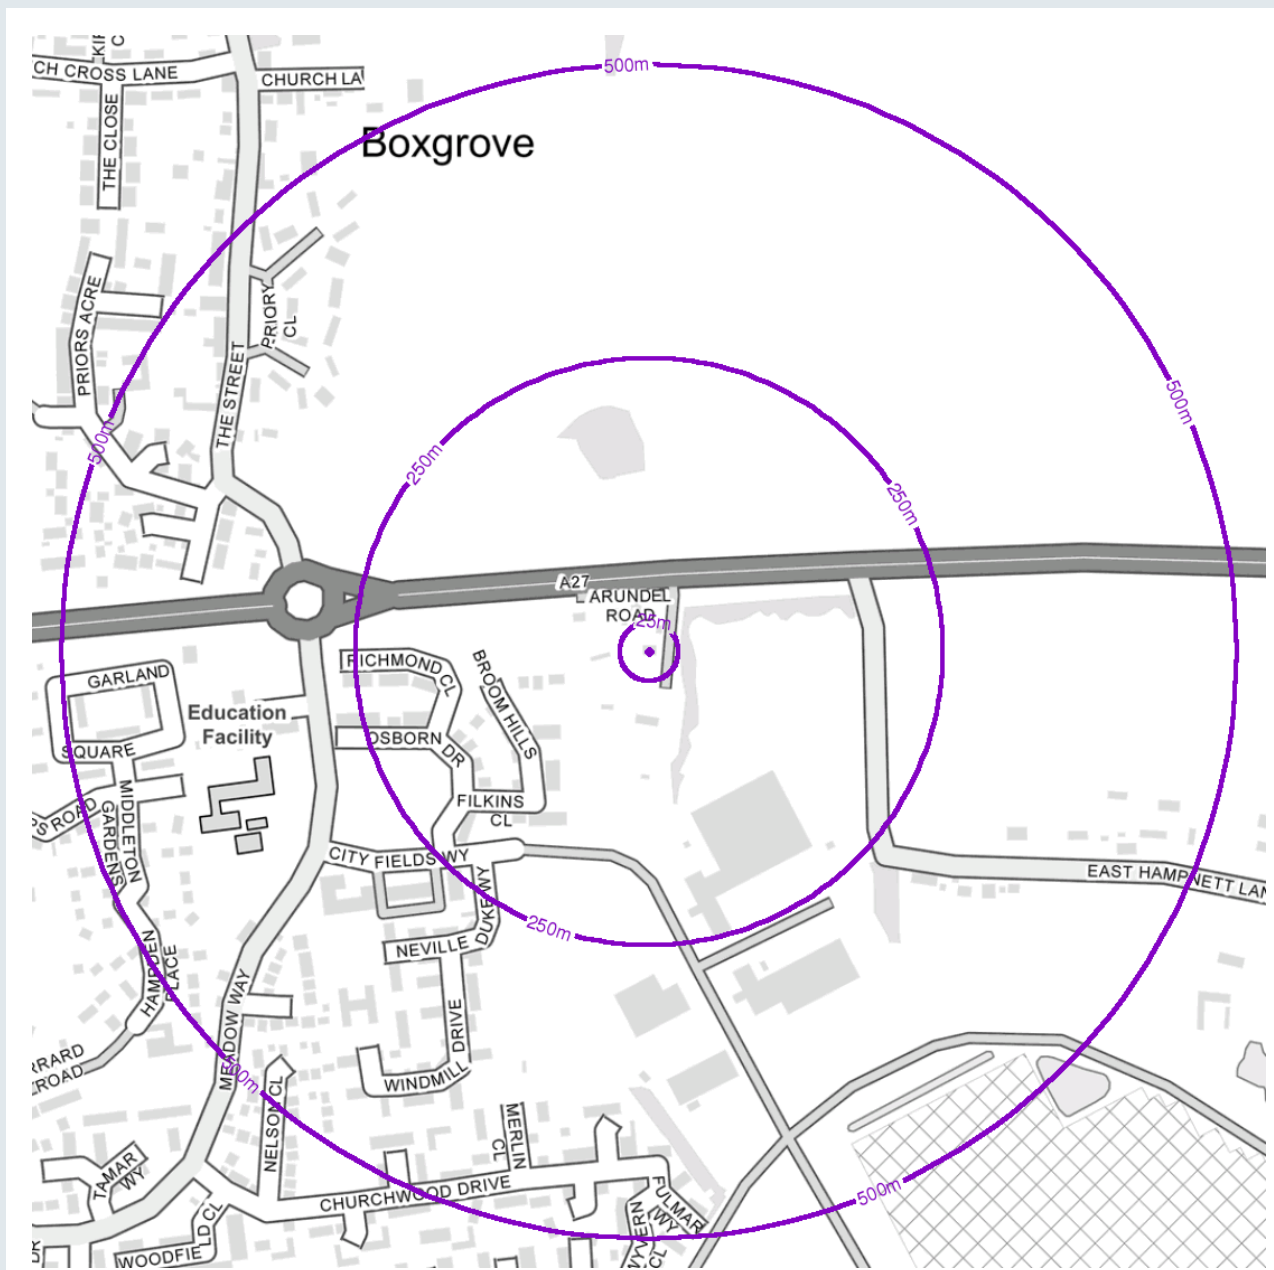

Further Action

Airtech Environmental Systems can advise on radon testing kits, which cost £39.36 including VAT and can run from 7 days to 3 months. They also have a team of surveyors on hand to provide recommendations and advice for any properties above the target level of 100 becquerel's per cubic meter or action level of 200 becquerel's per cubic meter. Airtech Environmental Systems can provide a report, recommendations and a quotation for any recommended works. For more detailed information please call their free-phone number 0800 378017.

Section 6a and 6b: Other Influential Factors

The map below shows the location of any Overhead Power Lines highlighted within Section 6a of this report. It also shows the location of any Environmental Constraints that are from datasets recognised as being relevant to Part 2A of the Environmental Protection Act 1990, that are highlighted in Section 6b of this report. Further details are shown on the following pages.

Contains Ordnance Survey data © Crown copyright and database right 2020

Section 6a

- Overhead Power Line
- Pylon or Mast

Section 6b

- Local Nature Reserves
- Marine Conservation Zones
- National Nature Reserves
- Ramsar Sites

- Sites of Special Scientific Interest
- Special Areas of Conservation
- Special Protection Areas

Section 6a: Overhead Power Lines

This section of the report contains information on pylons and overhead power lines. Overhead lines can be contentious and may have a visual impact on the surrounding area. Please note that Overhead Transmission Lines are extracted from Ordnance Survey Landline data in MasterMap and only show significant lines; if the pylons and lines are not shown on the mapping then they will not be reported.

Enquiry	Result	Contact
Are there any Overhead Power Lines within 250m of the property?	No	-

Section 6b: Environmental Constraints

This section provides information on areas which have been designated as having environmental or historical importance; as such there may be constraints on property or land developments or alterations.

Enquiry	Result
Is the property within 250m of an area likely to be impacted by Environmental Constraints?	No

The Landmark website contains links to many of our data suppliers which may prove useful.

Please note that the Environment Agency/Natural Resources Wales/SEPA have a charging policy in place for enquiries.

Useful Information

The following explanatory notes may be of assistance to users of the Envirosearch Residential report. Practitioners are reminded that full guidance notes are contained in the Practitioners Guide.

Professional Opinion

A Professional Opinion in relation to Part 2A of the Environmental Protection Act 1990 is provided by Argyll Environmental Ltd. In many cases the report will be PASSED without referral. However, in some cases, entries that may be of concern are revealed by the search, in which case the report is REFERRED free of charge for more detailed consideration, although this will not include a physical site inspection. After such referral the report may be PASSED or suggestions made of some FURTHER ACTION that could be taken, in the form of questions to ask of the appropriate authorities. When responses to these questions are received it is the responsibility of the client and their professional advisors to decide if they are happy to proceed.

Flood Risk

A limited flood risk screening exercise is included in this report designed to satisfy basic flood risk screening due diligence including consideration of river, coastal, surface water and groundwater flooding. Where a potential flood risk is "Identified" you may wish to consider commissioning a more detailed flood risk screening report. When there is "None Identified" this does not indicate that there is not risk of flooding at the property, but that the risk of flooding from the sources screened (river, coastal, surface water and groundwater) within the vicinity of the property is such that the risk may not be considered significant.

Positional Accuracy

We locate data in a variety of ways according to information provided to us and subsequent in-house research. If data is provided as a point on the ground, we provide a "positional accuracy" which tells you how confident we are of the actual location.

Section 1b: Landfill and Waste

At present no complete national data set exists for landfill site boundaries, therefore, a point grid reference, provided by the data supplier, is used for some landfill sites. In certain cases the point grid references supplied provide only an approximate position, and can vary from the site entrance to the centre of the site. Where the exact position of the site is unclear for Registered Landfill data, Landmark construct either a 100 metre or 250 metre "buffer" around the point to warn of the possible presence of landfill. The size of this "buffer" relates to the positional accuracy that can be attributed to the site. The "buffer" is shown on the map as a red hatched area. For further information regarding landfill sites identified in the report, please contact the relevant agency or authority referenced in the Useful Contacts section.

The BGS holds records of over 3,000 landfill sites that accepted waste prior to the Control of Pollution Act (COPA) 1974. These were not subject to any strict regulation or monitoring.

Permitted Waste Sites and Environmental Permitting Regulations - Waste cover current or recently current consents issued for landfill sites, waste transfer, treatment or disposal sites by the relevant agency, under Section 64 of the Environmental Protection Act 1990 (Part 2) and prescribed by regulation 10 of SI No. 1056 of the Waste Management Licensing Regulations 1994.

Section 1c: Potentially Contaminative Activities

Identified discharge consents could be for storm water discharges, soakaways or septic tanks.

If a radioactive substance licence has been identified the consent band will be given under enquiries and replies. Consents fall into one of four bands: Band 1 and 2 Nuclear licensed sites authorised by the Nuclear Installations Inspectorate e.g. nuclear power stations Band 3 Site registered/authorised to accumulate and dispose of radioactive materials, only non-nuclear operations are carried out on site e.g. hospitals Band 4 Sites registered to keep and use radioactive material e.g. laboratories, universities, commercial premises using appliances such as monitoring equipment, alarm systems, tritium lighting etc.

Data supplied for Explosive Sites, Control of Major Accident Hazards Sites (COMAH) and Notification of Installations Handling Hazardous Substances (NIHHS) contains public sector information published by the Health and Safety Executive and licensed under the Open Government Licence.

Section 1e: Other Potential Contaminative Land Uses

This section relates to categories of potentially contaminative land uses that have been identified by the analysis of selected Ordnance Survey historical mapping. The published date (range of dates) of the map (s) and the distance from the centre of search to the nearest point of the feature is given. Further details of the extent of the site or its activities are not available. Should you wish to examine the Ordnance Survey maps these are normally available for public inspection at the local archive or local major library. Alternatively, extracts of editions of Ordnance Survey maps are available on www.old-maps.co.uk

Potentially infilled land has been identified when a 'cavity' (a hole made by an extractive industry or natural occurrence e.g. pond) was indicated on a historic map but there was no evidence of its existence in the last available map for the area. No details of what may have been used to fill the cavity or exactly when or if it was filled are available from the mapping.

The point locations of historical tanks and energy facilities are identified from the text on Ordnance Survey 1:1250 and 1:2500 scale mapping published between 1943 and 1996, based upon a predetermined list of abbreviations, e.g. El Sub (Electricity Sub-station) and F Stn (Filling Station). The position of the point has been located at the centre of the identified text so that it would be within approximately 30 meters of the feature it was describing. The features themselves are related to energy and petroleum storage and cover the following: tanks, petrol storage, potential tanks (at depots etc.), electricity sub stations and related features, gas and gas monitoring related features, oil related features and miscellaneous power features. NB: It should be noted that the Ordnance Survey abbreviation for tank (tk) is the same as that for tracks. Therefore some of the captured text may relate to tracks and not tanks when the exact nature of the feature is not clear from the mapping.

Useful Information

Section 2: Flood Findings

Sections 2a, b and c of the report provide data on modelled extents of river, coastal and surface water flooding generated by JBA Risk Management, a market leader in flood risk assessment commonly engaged by insurers to assess flood risk. The data has been modelled for several perils or return periods: 1 in 75, 1 in 200 or 1 in 1000 which relate to areas with a 1.3%, 0.5% and 0.1% annual probability of flooding in any one year respectively. Properties at risk of flooding during a 1 in 75 year event are typically considered to be at a high risk of flooding. The data has been generated to provide a UK wide screening tool and as a result may have inherent limitations. In addition, there may be areas of the country which are modelled to varying degrees of accuracy based on currently available topographical information.

Section 2d of the report provides data relating to the Risk of Flooding from Rivers and Sea (RoFRS) dataset provided by the environment relevant agency. Each agency has used its own data to further assess the risk of river or coastal flooding to the area of land located within an extreme flood zone. It was originally conceived to guide where flood defences were most needed. The risk assessment takes into account a variety of hypothetical levels of rainfall or coastal flooding (both in terms of intensity and duration) and certain flood defences, which it assumes will work effectively. The data generated considers a 50m² area and assigns a risk level (either low, medium or high). The model does not differentiate between properties within the grid square, nor does it predict the depth of any resultant flood (merely the risk of a flood occurring). The RoFRS data does not include flood risk from very small catchments areas as these are not considered reliable for UK-wide flood risk assessments, nor does it consider the potential impacts of climate change on flood risk or provide coverage in Scotland. The assessment is regularly updated and Landmark uses the latest version supplied by RoFRS. Many insurers use RoFRS as a guide to where to offer flood risk insurance cover.

Section 2e of the report includes information relating to records of historical flooding provided by the Environment Agency/Natural Resources Wales. It should be noted that the historical flood event database is not comprehensive. Further details regarding the nature of any historical flood events are not supplied in this report, but can be obtained by contacting your local agency office.

Section 2f of the report provides data relating to the risk of groundwater flooding and is provided by GeoSmart, a leading independent scientific environmental consultancy specialising in water, land and sustainable development. Through research and development, building on their expertise in addressing groundwater flooding issues for the Environment Agency/Natural Resources Wales and other clients in the UK, GeoSmart has developed algorithms and calibrated predictions of the risk of groundwater flooding occurring in England and Wales. This differs from other suppliers of data regarding groundwater flooding which only report on the susceptibility of groundwater flooding. Susceptibility merely has to be identified, whereas risk must be quantified. The resulting data is a 5x5m classification of groundwater flooding risk into four categories (Negligible, Low, Moderate and High). GeoSmart's classifications are based on the level of risk, combining severity and uncertainty that a site will suffer groundwater flooding within a return period of about 100 years.

The data is a general purpose indicative screening tool, and is intended to provide a useful initial view for a wide variety of applications. However, it does not provide an alternative to a site specific assessment, and a detailed risk assessment should be used for any site where the impact of groundwater flooding would have significant adverse consequences.

Section 3: Energy & Infrastructure Findings

The Energy & Infrastructure section has been designed to satisfy standard due-diligence enquiries for residential and commercial sites. It is a limited, desk-based screen - we would recommend purchasing an Argyll Energy & Infrastructure report for further information. The report does not include data on all UK energy and infrastructure projects, nor does Landmark Information Group make specific information requests of the regulatory authorities for any relevant information they may hold. Therefore, Landmark Information Group cannot guarantee that all land uses or factors of concern will have been identified by the report. Landmark Information Group is unable to comment directly with regards to the potential effect these key energy or infrastructure projects will have on the value of nearby properties. We would recommend contacting an appropriate surveyor who can provide a valuation. While every effort is made to ensure accuracy, Landmark Information Group cannot guarantee the accuracy or completeness of such information or data. We do not accept responsibility for inaccurate data provided by external data providers. For further information regarding the datasets reviewed within our analysis, please contact our customer services team on 0844 844 9966. Crossrail 2 data is sourced from consultation documents as published by the Department of Transport

Section 5: Radon Findings

Due to the nature of way the information is gathered, your property/site may have more than one probability of radon attributed to it. We report the worst case scenario on the property/site you have provided. This information is an estimate of the probability that a property /site in Great Britain is at or above the "Action Level" for radon (the level at which Public Health England recommends that radon levels should be reduced, those with an average of 200 Bq m⁻³ or more). This information satisfies CON29 Standard Enquiry of Local Authority; 3.13 Radon Gas: Location of the Property in a Radon Affected Area and can also be used to advise house buyers and sellers in Scotland. Where the property/site is a new build, this information provides information on the level of protection required for new buildings under BR211 (Scivyer, 2007) Radon: Guidance on protective measures for new buildings and BR376 (BRE, 1999) Radon: Guidance on protective measures for new dwellings in Scotland.

Disclaimer: "Some of the responses contained in this section are based on data and information provided by the Natural Environment Research Council (NERC) or its component bodies the British Geological Survey (BGS). Your use of any information contained in this report which is derived from or based upon such data and information is at your own risk. Neither NERC, BGS nor Public Health England where applicable, gives any warranty, condition or representation as to the quality, accuracy or completeness of such information and all liability (including liability for negligence) arising from its use is excluded to the fullest extent permitted by law."

Section 6b: Environmental Constraints

The Local Nature Reserves national dataset is "indicative" not "definitive". Definitive information can only be provided by individual local authorities and you should refer directly to their information for all purposes that require the most up to date and complete dataset.

Useful Information

General

If after reading the details in this report regarding the sites identified, you still require further information, please contact the relevant agency or authority indicated in the Useful Contacts section quoting the corresponding reference given in the text of the report.

The contacts in the Useful Contacts section may be able to provide further information relating to items identified in the report, however they are not in a position to advise how these might affect the value of a property. The findings of the report should be discussed with your professional advisor.

The Purpose and Scope of the Report

The report is designed to satisfy the concerns raised by the Law Society warning card and has been prepared to assist conveyancing professionals who may be advising clients when they sell or buy a property, obtain a mortgage, seek further mortgage advice, or commence any building works. It is designed to bring information to their attention and help them decide whether they need to seek any further specialist advice. As the report is so detailed, this information can cause concern, but professional advisors will see that further action is suggested on all issues that have been identified.

Limitations

This report has been published by Landmark Information Group Limited ("Landmark") and is supplied subject to our Terms and Conditions of Business, which can be found at <http://www.landmarkinfo.co.uk/Terms/Show/515>. It has been prepared on the understanding that it is to be used for an individual residential property transaction and should not be used or relied upon in a commercial property transaction. This report is neither a guarantee of the physical condition of the subject property nor a substitute for any physical investigation or inspection. The information in Envirosearch Residential is derived from a number of statutory and non-statutory sources (see The Practitioner Guide for details). Whilst every effort is made to ensure the details in the report are correct, Landmark cannot guarantee the accuracy or completeness of such information or data, nor identify all the factors that may be relevant. If you are a private individual using this report Landmark recommends that you discuss its contents in full with your professional advisor. The methodology for risk assessment and the conclusions drawn therefrom are the responsibility of Argyll Environmental Ltd.

Insurance

Houses registered between 1st April 1999 and 31st December 2002 and covered by the NHBC Buildmark scheme probably have insurance against certain costs if contamination occurs within ten years of their construction. From 1st January 2003, NHBC will only provide this cover if building control has been carried out by NHBC Building Control Services Limited.

Landmark Standard Terms and Conditions

Full Terms and Conditions can be found on the following link: <http://www.landmarkinfo.co.uk/Terms/Show/515>

If you experience difficulties accessing our Terms and Conditions, please copy and paste the link directly into your browser, you will then be able to access our Terms and Conditions from there. Should you still experience difficulties, please telephone our Customer Service Team on 0844 844 9966.

Important Consumer Protection Information

This search has been produced by Landmark Information Group Ltd, Imperium, Imperial Way, Reading, Berkshire, RG2 0TD

Tel: 0844 844 9966
Fax: 0844 844 9980
Email: helpdesk@landmark.co.uk

Landmark adheres to the Conveyancing Information Executive (CIE) standards.

The Standards:

- Conveyancing Information Executive Members shall act in a professional and honest manner at all times in line with the Conveyancing Information Executive Standards and carry out the delivery of the Search with integrity and due care and skill.
- Compliance with the Conveyancing Information Executive Standards will be a condition within the Conveyancing Information Executive Member's Terms and Conditions.
- Conveyancing Information Executive Members will promote the benefits of and deliver the Search to the agreed standards and in the best interests of the customer and associated parties.
- The standards can be seen here: <http://www.conveyinfoexec.com>

Complaints

If you have a query or complaint about your search, you should raise it directly with the search firm, and if appropriate ask for any complaint to be considered under their formal internal complaints procedure. If you remain dissatisfied with the firm's final response, after your complaint has been formally considered, or if the firm has exceeded the response timescales, you may refer your complaint for consideration under The Property Ombudsman scheme (TPOs). The Ombudsman can award up to £5,000 to you if the Ombudsman finds that you have suffered actual financial loss and/or aggravation, distress or inconvenience as a result of your search provider failing to keep to the Standards.

Please note that all queries or complaints regarding your search should be directed to your search provider in the first instance, not to TPO.

TPOs Contact Details:

The Property Ombudsman scheme
Milford House
43-55 Milford Street
Salisbury
Wiltshire SP1 2BP

Tel: 01722 333306
Fax: 01722 332296
Website: www.tpos.co.uk
Email: admin@tpos.co.uk

Complaints Procedure

If you want to make a complaint to Landmark, we will:

- Acknowledge it within 5 working days of receipt.
- Normally deal with it fully and provide a final response, in writing, within 20 working days of receipt.
- Keep you informed by letter, telephone or e-mail, as you prefer, if we need more time.
- Provide a final response, in writing, at the latest within 40 working days of receipt.
- Liaise, at your request, with anyone acting formally on your behalf.

Complaints should be sent to:

Customer Relationships Manager
Landmark Information
Imperium
Imperial Way
Reading
RG2 0TD

Tel: 0844 844 9966
Email: helpdesk@landmark.co.uk
Fax: 0844 844 9980

If you are not satisfied with our final response, or if we exceed the response timescales, you may refer the complaint to The Property Ombudsman Scheme (TPOs):

Tel: 01722 333306
Email: admin@tpos.co.uk

We will co-operate fully with the Ombudsman during an investigation and comply with his final decision.

Understanding This Section

Development in the UK is controlled by the government's planning legislation, which is regulated and enforced by your local authority planning department. In Section 1 of this report, we have included planning applications submitted within the last 7 years in your local area to inform you of current or future developments that could influence your enjoyment and use of the property. This report is an overview of the area, and you should further investigate any applications that could affect you.

Whether Landmark are able to display a point or a polygon for each large planning application record, is limited by: the presence or absence of the planning application having been made available online; the availability/accessibility of the plan on the Local Authority website; and Landmark's ability at a point in time to capture the record. Landmark do not hold polygon information for all large planning applications. Small applications will be represented by a point, although a limited number may be presented as a polygon.

Interpreting the Planning Application Table

ID	Application No.	Distance & Direction	Location Accuracy	Site Area	Contact ID
	Address	Use Class	Submission Date	Type	
		Decision			
		Description			

1 The ID number shows the application on the map.

2 This is the application number and should be quoted when contacting your local planning department. If this shows 'Potential Development' instead it is indicating a tender or contract. This records potential development that has not yet resulted in, or required, a planning application.

3 This gives you a bearing to find the application on the map quickly.

4 This shows how confidently we have been able to plot the location on a map using the application details.
 'Good' means the application has sufficient detail to identify the exact site of the application.
 'Fair' means we have been able to identify an adjacent site e.g. the application address may be 'Land adjacent to No.1'.
 'Approx' means the address details only identify the road of the application.
 'Wider Area' means only the general vicinity of the site can be identified.
 'Multiple Sites' refers to development on more than one site.

5 This is an indication of the development size.

6 This is the contact reference of the local authority. See Next Steps.

7 This is the address of proposed development.

8 This indicates the intended use of the property. A list of all 'Use Classes' can be found to the rear of section 1. Note that 'Sui Generis' refers to 'Other Uses', i.e. applications where no use class can be defined.

9 This is the date the application was submitted to the local authority. Records may take around 6 weeks from this date to appear in the report.

10 This indicates the type of work associated with the application, for example 'New Build', 'Refurbishment or Repair' or 'Demolition' etc.

11 This is the last known decision as made by the planning authority.

12 This provides a description of any extra information about the planning application.

Applications are often submitted with imprecise or incomplete address details and because of this the locations we use may not always represent a development site's full extent. We endeavour to position applications in the most appropriate location we can, using the address details available to us. If nearby development is likely to significantly influence your choice to purchase the property we would recommend you use this report as a starting point for more extensive investigations.

Next Steps

If you would like further information about a particular planning application please contact the relevant planning authority and quote the application reference. Alternatively you can search for the application within the local authority's online planning database. The authority's details can be found by cross referencing the Contact ID in the application details with the 'Useful Contacts' section at the back of the report.

For help with the report contact our Customer Services Team on 0844 844 9966 or email helpdesk@landmark.co.uk

Useful Information

A planning permission is an approval from your local authority allowing you to carry out some form of development or change to property or land. You apply to your local authority to obtain this permission.

Is Planning Permission needed?

Most changes will require planning permission from your local authority but some forms of development may fall within 'permitted development rights' and not require planning permission. The types of development allowed under these rights can depend on your local authority and additional factors such as whether the property is in a conservation area or national park. Common types of permitted development are small alterations and minor extensions to residential dwellings. Information about the types of development allowed under your permitted development rights is available from the Planning Portal (details below) or from your local planning authority (see the Contacts page).

If you are considering any development it is advisable to contact your local planning authority to check if planning permission is required for the intended works. Your local planning authority may also have a useful duty planner service or provide pre-application advice, although there could be a charge for this.

Applying for Permission

If planning permission is required an application is made to the local planning authority. The type of application and supporting information required will depend on the scale of works proposed.

Once an application has been made the local authority may notify relevant parties, such as immediate neighbours, and the application may be advertised locally for a consultation period. Public comments can then be made on the application for consideration by the local planning authority.

Planning Decisions

A planning officer will consider the application and any supporting information and make a recommendation for approval or refusal. Depending on the type of application the final decision may be made by the officer through 'delegated powers', or the information could be passed to a planning committee.

The local authority will explain the reasons for refusing any applications. The applicant could then choose to re-submit the application with amendments. The result can also be appealed through the planning inspectorate, however this can be a complicated and costly procedure and would not normally be undertaken without obtaining further professional guidance. Consequently, where an application is listed in this report as refused it may later be granted on appeal. Therefore if an application within this report concerns you we would strongly advise you to find out more from your local planning authority.

Planning applications are usually decided within 8 weeks of the application date, although this can be extended to 13 weeks where the application is large or complex. Unless acted upon a planning permission will lapse after either 3 or 5 years, depending on whether it is an 'outline' or 'full' (sometimes called 'detail') application.

Helpful Resources

<http://www.planningportal.gov.uk> - The Planning Portal is the governmental planning information website. You can access guides about the planning system and also submit applications through this website.

Section 1b : Planning Applications Map

The map below shows the location of new build developments over 50 dwellings within 750m. Details of these applications are listed in the tables that follow.

	Land North of Netherhouse Copse Hitches Lane Fleet, Hampshire, GU51 5SP	C3	24th June 2016	New Build		
		Outline application granted				
		Outline application for up to 423 residential dwellings and a community facility. Associated vehicular, pedestrian and cycle access, drainage and landscape works, including provision of public open space and sports pitches. Provision of country park/SANG as an extension to Edenbrook Country Park.				

Section 1d : Planning Applications Map

The map below shows the location of medium non-residential planning applications within 250m and large non-residential planning applications within 750m of the property. Details of these applications are listed in the tables that follow.

Contains Ordnance Survey data © Crown copyright and database rights 2020

	Property		Non-residential Medium
	Search Radii		Non-residential Large
	Map ID		Polygon Planning Application
	Multiple Features Present		

Large Non-residential Developments (within 750m)

The records below relate to large non-residential applications for example, schools, large offices and retail developments. These applications generally have a total floor area of over 1500m².

ID	Application No.	Distance & Direction	Location Accuracy	Site Area	Contact

	Morrisons Elvetham Heath Way Fleet, Hampshire, GU51 1GY	A1/A3/A4/A5	15th December 2017	Extension	
	Detail application granted Proposed extension to existing supermarket including alterations to the existing car park				

Use Class Table

The following table shows the Use Class codes used in Section 1: Planning Applications.

Use Class	Category Description	Notes
A1	Shops	General Retail
A2	Financial and Professional Services	e.g. banks, estate agents etc.
A3	Restaurants and Cafes	
A4	Drinking Establishments	Pubs/wine bars (not nightclubs)
A5	Hot Food Takeaways	
B1	Business	Offices etc. (not those that fall within A2 e.g. Estate Agents)
B2	General Industry	
B8	Storage or Distribution	Warehouses etc.
C1	Hotels	
C2	Residential Institutions	Hospitals, nursing homes, boarding schools
C2(a)	Secure Residential Institutions	Prisons, young offenders institutes etc.
C3	Dwelling Houses	
C4	Houses in Multiple Occupation	Small shared houses occupied by between 3 and 6 unrelated individuals, as their only or main residence, who share basic amenities such as a kitchen or bathroom
D1	Non Residential Institutions	Schools, museums, libraries etc.
D2	Assembly and Leisure	Cinemas, music and concert halls, swimming pools etc.
Sui Generis		Anything not falling into the above, e.g. petrol stations, nightclubs, taxi business, amusements etc.

Understanding This Section

Each local authority will produce a series of development plans which outline the desired approach to land use and development for the area. These plans provide an indication of what types of development the local authority might encourage or restrict in the future. In Section 2 we have considered the maps included in development plans and summarised the key designations that apply to your area. You should consider how these could affect you and your property.

Section Overview

We have organised the designations and any related policies into key themes. Each section will show the areas designated on mapping within the development plan and provide details of the document and policy that can be researched for further details.

Some of the information we gather is not mapped as the quality or scale of the source mapping means we are unable to accurately plot these features. These are usually area wide policies or sites captured from general indicative diagrams. These will be shown in the tables as 'Not Mapped', however we will provide as much information as we can gather.

Some designations may be captured from the mapping within development plans and not have an associated policy. These will be shown with 'No Associated Policy'. We provide as much information as we can gather from the mapping.

Section 2a: Housing and Community

For example, policies relating to Housing, Recreation and Education.

Section 2b: Business and Economy

For example, policies relating to Industry, Tourism and Retail.

Section 2c: Resources and Waste

For example, policies relating to Water, Energy and Minerals.

Section 2d: Transport Infrastructure

For example, policies relating to Roads, Rail and Public Transport

Section 2e: Heritage and Open Environment

For example, policies relating to Green Belt, Conservation and Historic Sites.

Section 2f: Other Sites

For example, policies relating to Mixed Usage Sites and Military Installations.

Next Steps

You can find further information about a policy or designation within the associated development plan. The 'Summary of Development Plans in Your Area' page will help you find the document you need.

Each section will provide details of the relevant document, policy (if applicable) and map the information was captured from. The policy number will confirm where in the local authority document further detailed information is available. If, following this, you would like further clarification please contact the relevant authority.

For help with the report contact our Customer Services team on 0844 844 9966 or email helpdesk@landmark.co.uk

Useful Information

What are Development Plans?

As well as managing development in your local area through the planning application system, your local authority will produce development plans. These will outline the desired approach to land use and development in the area. The plans will aim to address a wide range of environmental, economic and social needs with the overall aim of sustainable development.

Planning application decisions have to be made in accordance with the policies of the development plan, so these documents are important as they indicate what forms of development might be approved nearby in the years to come.

National guidelines are individually published by the English, Welsh and Scottish governments. These documents outline the government's view on development and planning policy. They will also provide the framework and requirements local authorities will consider to produce the policies for their area.

National legislation is important as this provides the overall strategy for development. Where a local authority local plan is judged to be out-of-date or insufficient national policy may supersede it, or be a material consideration for any application.

What are Local Plans and Local Development Frameworks?

Local authorities will publish policies and proposals in their development plans.

Older development plans are often known as a Local Plan or Unitary Development Plan (UDP). More recently, after a change in planning legislation in 2004, English authorities started to produce their plans as a series of documents referred to as the Local Development Framework (LDF). An LDF will consist of a series of statutory documents, such as a Core Strategy and Proposals Map. A local authority may also produce a series of non-statutory supplementary planning documents (SPD's) that will provide guidance on specific development topics.

This series of documents may be produced gradually and while new documents are being drafted and approved some policies may be 'saved' from an earlier development plan. These will then be replaced as newer emerging documents are adopted. This means that in some areas older development plans may still be considered relevant alongside newer documents.

In Scotland and Wales Local Development Plans (LDP's) are gradually replacing any older Local Plans and UDP's.

As national legislation changes, local planning authorities may change their approach to creating development plans. For example, the introduction of the 'National Planning Policy Framework' (NPPF) in 2012 has meant that development plans in England are starting to be referred to as Local Plans again, and local authorities are being encouraged to only produce additional supplementary documents where absolutely required.

Neighbourhood Planning

In England, local communities are now being given an opportunity to shape and inform development plans for their area. Parish councils, town councils, or neighbourhood forums can develop a 'Neighbourhood Plan' to outline the community's aspirations. If approved these neighbourhood plans will then form part of the framework for the area and will be considered by the local planning authority for future planning decisions. There is currently no formal equivalent in Scotland and Wales, but local communities are encouraged to participate in discussions concerning local service delivery.

If you are interested in Neighbourhood Plans in your area we recommend you contact your local authority for more information.

Summary of Development Plans in Your Area

This section provides an overview of the development plan documents that are relevant to your area. It will clarify which documents we have considered to produce the report. This section will also list any additional documents we have not considered; you may wish to investigate these independently.

Which Development Plans have we searched?

This report will provide details of development plans published by Local Authorities. We capture plans at 'deposit' stage (when a draft plan is submitted for approval) and again when formally adopted. The following documents within the surrounding area have been captured by us.

Plan Name	Local Authority	Plan Status	Date
Local Plan: Strategy and Sites	Hart District Council, Environmental Services	Submission Draft	18th June 2018
Hart District Local Plan (Replacement) 1996-2006	Hart District Council, Environmental Services	Adopted	23rd April 2002

We will report information taken from maps within these documents if policies and designations are found within the search distances we have used for each section.

Each development plan will also contain detailed explanations of various policies and proposals for the area, some of which are likely to be unmapped and so will not be included in this report.

Other Documents in your Area

Alongside the main development plans we summarise there can be other documents that have been published that may also be relevant to your area. This may also include plans that are still being prepared, or that have very recently been published, and therefore have not yet been considered by us.

If a document appears on this list it does not necessarily mean that your property is directly affected by the plan, but that your property is considered to be within the area the document covers. These could be documents such as area wide strategic plans or guidance statements. You may wish to research these documents independently.

Plan Name	Local Authority	Plan Status	Adopted Date
Hampshire - Statement of Community Involvement	Hampshire County Council	Adopted	2017
Community Infrastructure Levy (CIL)	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Neighbourhood Plan - Rotherwick	Hart District Council, Environmental Services	Adopted	2016
Neighbourhood Plan - Crookham	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Neighbourhood Plan - Odiham	Hart District Council, Environmental Services	Adopted	2017
Neighbourhood Plan - Hook	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Neighbourhood Plan - Hartley Wintney	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Neighbourhood Plan - Winchfield	Hart District Council, Environmental Services	Adopted	2017
Neighbourhood Plan - Fleet	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Neighbourhood Plan - Dogmersfield	Hart District Council, Environmental Services	Under Preparation	Not Supplied

Plan Name	Local Authority	Plan Status	Adopted Date
Neighbourhood Plan - Crondall	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Neighbourhood Plan - Blackwater and Hawley	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Neighbourhood Plan - Yateley	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Hart - Traveller DPD	Hart District Council, Environmental Services	Under Preparation	Not Supplied
Hampshire - Minerals and Waste Plan	Hampshire County Council	Preparation Planned	Not Supplied
Hart - Local Plan, First Alteration (Replacement 1996 - 2006)	Hart District Council, Environmental Services	Adopted	2006
Hampshire - Minerals & Waste Development Scheme	Hampshire County Council	Adopted	2014
Hart - Local Development Scheme	Hart District Council, Environmental Services	Adopted	2019
Hart - Local Plan Part 2: Development Management & Other Site Allocations	Hart District Council, Environmental Services	Preparation Planned	Not Supplied
Hampshire - Minerals and Waste Plan	Hampshire County Council	Adopted	2013
Hart - Statement of Community Involvement	Hart District Council, Environmental Services	Adopted	2017

Where can you find these plans?

A local authority will usually publish development plans on their website. The planning policy sections of the relevant local authority websites are listed below. If a plan is not available here you may be able to obtain a copy by contacting the relevant local authority.

Local Authority	Planning Policy Website
Hart District Council	https://www.hart.gov.uk/Current-planning-policy-guidance
South East Regional Assembly, Planning	Not Supplied
Ministry of Housing, Communities and Local Government	Not Supplied
Environment Agency, Head Office	Not Supplied

Section 2a: Housing and Community

The tables below provide information about the policies and designations within your area that relate to Housing and Community. For example, this could include housing developments, education and health care provision.

Recent Plans

The following tables contain recent plans for your area. We consider recent plans to be documents published since an update to planning legislation in 2004 meant local authorities changed the way they prepare development plans. From these plans, we have found the following designations in your area.

Plan	Local Plan: Strategy and Sites (18th June 2018) Submission Draft		
ID	Description	Policy Detail	Source Map
Not Mapped - (Due to Quality of Source Mapping)	Planning Permissions and Deliverable Site of Over 50 Dwelling	No associated policies	Figure 3 Key Diagram

Section 2d: Transport Infrastructure Map

The map below shows policies and designations relating to Transport and Infrastructure in your local area. Further information is provided in the tables that follow.

Contains Ordnance Survey data © Crown copyright and database rights 2020

| | Multiple Features Present | | | | |

Section 2d: Transport Infrastructure

The tables below provide information about the policies and designations within your area that relate to Transport Infrastructure. For example, this could include public transport, cycling routes and traffic management schemes.

Older Plans

The following tables contain plans published prior to 2004, or prepared under the pre-2004 approach and then published at a later date. The local authority will be in the process of replacing these plans with newer documents, but even where later plans are available some policies and designations from within the below plans may be 'saved' and still relevant. From these plans, we have found the following designations in your area.

Plan	Hart District Local Plan (Replacement) 1996-2006 (23rd April 2002) Adopted		
ID	Description	Policy Detail	Source Map
10	Outside Settlement Boundaries : Transportation	T14: Transport And Development	Proposals Map
10	Outside Settlement Boundaries : Transportation	T15: Development Requiring New Or Improved Access	Proposals Map
10	Outside Settlement Boundaries : Transportation	T1: Integrated Transport Network	Proposals Map
10	Outside Settlement Boundaries : Transportation	T2: Public Transport: General	Proposals Map
10	Outside Settlement Boundaries : Transportation	T5: Highways Network	Proposals Map

Next Steps

If you are interested in the potential impact of the HS2 or Crossrail routes on your property we recommend that you purchase an [Argyll Energy & Infrastructure Report](#). This report has been produced to specifically consider the impacts of these types of development.

If you would like more information please contact your Search Provider or our Customer Services Team on 0844 844 9966 or email helpdesk@landmark.co.uk.

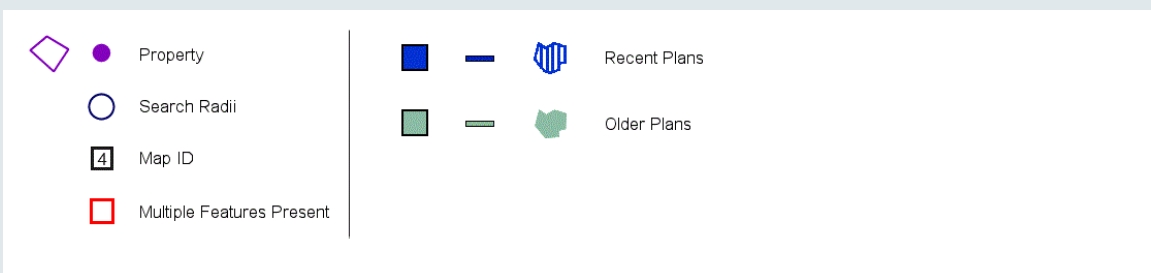

Section 2e: Heritage and Open Environment Map

The map below shows policies and designations relating to Heritage and the Open environment in your local area. Further information is provided in the tables that follow.

Contains Ordnance Survey data © Crown copyright and database rights 2020

Section 2e: Heritage and Open Environment

The tables below provide information about the policies and designations within your area that relate to Heritage and the Open environment. For example, this could include conservation areas, the Green Belt and Areas of Outstanding Natural Beauty (AONB's). Specially designated heritage areas, or areas with heritage polices, can sometimes have associated development restrictions or conditions. There can also be restrictions to development if you live near a site with an environmental designation. These restrictions can be of value to residents as they often aim to enhance and preserve the character of the area. However, if you are planning to alter or develop your property in the future it would be prudent to check any impacts.

Older Plans

The following documents are plans that were published prior to 2004, or were prepared under the pre-2004 approach and then published at a later date. The local authority will be in the process of replacing these plans with newer documents, but even where later plans are available some policies and designations from within the below plans may be 'saved' and still relevant. From these plans, we have found the following designations in your area.

Section 2f: Other Sites Map

The map below shows policies and designations relating to 'Other Sites' in your local area. Further information is provided in the tables that follow.

Contains Ordnance Survey data © Crown copyright and database rights 2020

	Property				Recent Plans
	Search Radii				Older Plans
	Map ID				
	Multiple Features Present				

Section 2f: Other Sites and Boundaries

The tables below provide information about the policies and designations within your area that relate to 'Other Sites'. This includes areas that have been identified for mixed use, or for more general development and regeneration.

This section also provides details of any designations in your area we have captured as 'boundaries'. These are designations indicating the limits of a particular defined area. For example, a settlement boundary will generally show the area that, for the purpose of the development plan, forms a particular settlement (e.g. a town). This might be used when forming or explaining policies, eg. policies could reference that development within a settlement boundary may be preferred over development outside a settlement boundary.

Recent Plans

The following tables contain recent plans for your area. We consider recent plans to be documents published since an update to planning legislation in 2004 meant local authorities changed the way they prepare development plans. From these plans, we have found the following designations in your area.

Plan	Local Plan: Strategy and Sites (18th June 2018) Submission Draft		
ID	Description	Policy Detail	Source Map
17	Existing Settlement Policy Boundary	No associated policies	Fleet Settlement Policy Boundary
15, 16	Proposed Extension to Settlement Policy Boundary	No associated policies	Fleet Settlement Policy Boundary
Not Mapped - (Due to Quality of Source Mapping)	Main Urban Area	No associated policies	Figure 2 Hart's Settlement Hierarchy

Older Plans

The following tables contain plans published prior to 2004, or prepared under the pre-2004 approach and then published at a later date. The local authority will be in the process of replacing these plans with newer documents, but even where later plans are available some policies and designations from within the below plans may be 'saved' and still relevant. From these plans, we have found the following designations in your area.

Understanding This Section

In this section we have summarised some information about the local area to give you an overview of your neighbourhood. This includes information about the type of housing and people you might find in your vicinity. We also provide information about the key services and facilities nearby that may be useful to you when you move into your new home.

Section Overview

Section 3a: Rights of Way

The Ordnance Survey map in this section shows rights of way in your area. A 'right of way' is the legal right to use a specified route through grounds, or across property, that belongs to someone else.

Section 3b: Housing

This section provides general information about the ownership, type and average prices of property in your neighbourhood. This section will also show the Council Tax bands for your area.

Section 3c: Population

This section shows the age, education and occupation profiles of people within your local community.

Section 3d: Education

This section identifies educational establishments in your area. A map will show the school locations and further details are included in tables that follow.

Section 3e: Amenities

This section identifies the nearest useful facilities and services in your neighbourhood. This includes a wide range of amenities from doctors to supermarkets.

Next Steps

For further information you can visit the web links provided throughout this section. For help with the report contact our customer service team on 0844 844 9966 or helpdesk@landmark.co.uk

Section 3a: Rights of Way Map

The map below shows the existing public footpaths, bridleways and byways identified on Ordnance Survey 1:25000 mapping.

© Crown copyright and database rights 2020 Ordnance Survey 100022432.

<ul style="list-style-type: none"> Property Search Radii 	<p>Public Rights of way (Rights of way are not shown on maps of Scotland)</p> <ul style="list-style-type: none"> Footpath Bridleway Byway open to all traffic Road used as a public path <p>The representation on this map of any other road, track or path is no evidence of the existence of a right of way. Full list of symbols is shown in the User Guide.</p> <p>Other Public Access</p> <ul style="list-style-type: none"> Other routes with public access <p>The exact nature of the rights on these routes and the existence of any restrictions may be checked with the local highway authority. Alignments are based on the best information available.</p>	<ul style="list-style-type: none"> National trail or Recreational path Permitted Bridleway Permitted Footpath <p>Paths and bridleways along which landowners have permitted public use but which are not rights of way. The agreements may be withdrawn.</p> <ul style="list-style-type: none"> Permitted Bridleway coincident with a right of way. Selected cycle route off and on road.
--	--	---

Section 3b: Housing

The information below provides an overview of housing statistics for the nearby area.

Council Tax

The table below shows you the Council Tax Bands for your Local Authority. You can visit www.voa.gov.uk to establish the council tax band of your property.

Local Authority: Hart District Council

Tax Band	Band A	Band B	Band C	Band D	Band E	Band F	Band G	Band H
Local Cost	£1172	£1367	£1562	£1757	£2148	£2538	£2929	£3515

Housing Market

The pie chart below provides an indication of the types of home ownership likely in GU51 5BP.

© CallCredit Marketing Limited

Housing Type

The pie chart below provides an indication of the types of housing likely in GU51 5BP.

© CallCredit Marketing Limited

Average Property Price

The average property price in GU51 5BP is :

£353207 - £402607

The average price bands are calculated by EuroDirect using the latest available data from Her Majesty's Land Registry. They represent a snapshot in time as at the most recent date. Please note, where a postcode comprises less than 16 addresses the information is derived from the wider postcode sector.

Section 3c: Population

The information below provides an overview of the local community.

Qualifications

The pie chart below shows the level of qualification attained by people in your area.

- No Qualifications
- Lower level Qualifications
- Higher Level Qualifications

No Qualifications includes people with an education level below GCSE
 Lower Level Qualifications includes people educated to at least a GCSE level
 Higher Level Qualifications defines people educated to at least a University level

Contains public sector information licensed under the Open Government Licence v3.0

Age

The graph below provides an indication of the age profile likely in GU51 5BP.

Further Education

No schools found

Other Schools and Education Centres

These are other educational facilities with OFSTED ratings. This could include some independents schools and special schools.

ID	Name and Address	School Type	Inspection Result
39	Grey House Preparatory School, RG27 8PW	Independent	Good

The school admission process can vary depending on the individual school or Local Authority. For general information about selecting and applying for school places please visit www.gov.uk/schools-admissions. Your local council will also be able to provide further advice about the process in your area.

We do not currently hold inspection results for establishments in Scotland, but these are available at www.educationscotland.gov.uk.

Most schools are only inspected every few years. If you would like to investigate ratings and read the full inspection reports these are available at www.ofsted.gov.uk (England), www.estyn.gov.uk (Wales) or www.educationscotland.gov.uk (Scotland).

Section 3e: Amenities

This section provides the location of key facilities near to your property.

Where Is The Nearest...?

Post Box	Letter Box - Fitzroy Road, GU51	510m SE
Post Office	Post Office (Fleet) - 229, Fleet Road, Fleet, GU51 3HH	1.7km E
Hospital	Fleet Hospital - Church Road, Fleet, GU51 4LZ	1.1km E

Important Consumer Protection Information

This search has been produced by Landmark Information Group Ltd, Imperium, Imperial Way, Reading, Berkshire, RG2 0TD

Tel: 0844 844 9966

Fax: 0844 844 9980

Email: helpdesk@landmark.co.uk

Landmark adheres to the Conveyancing Information Executive (CIE) standards.

The Standards:

- Conveyancing Information Executive Members shall act in a professional and honest manner at all times in line with the Conveyancing Information Executive Standards and carry out the delivery of the Search with integrity and due care and skill.
- Compliance with the Conveyancing Information Executive Standards will be a condition within the Conveyancing Information Executive Member's Terms and Conditions.
- Conveyancing Information Executive Members will promote the benefits of and deliver the Search to the agreed standards and in the best interests of the customer and associated parties.
- The standards can be seen here: <http://www.conveyinfoexec.com>

Complaints

If you have a query or complaint about your search, you should raise it directly with the search firm, and if appropriate ask for any complaint to be considered under their formal internal complaints procedure. If you remain dissatisfied with the firm's final response, after your complaint has been formally considered, or if the firm has exceeded the response timescales, you may refer your complaint for consideration under The Property Ombudsman scheme (TPOs). The Ombudsman can award up to £5,000 to you if the Ombudsman finds that you have suffered actual financial loss and/or aggravation, distress or inconvenience as a result of your search provider failing to keep to the Standards.

Please note that all queries or complaints regarding your search should be directed to your search provider in the first instance, not to TPO.

TPOs Contact Details:

The Property Ombudsman scheme
Milford House
43-55 Milford Street

Professional Opinion and Next Steps

Please see below our Professional Opinion and Next Steps with regards to the property. These may be copied into your Report on Title if you wish.

Former Mining

IDENTIFIED

Professional Opinion

Landmark Information have identified the following former mining features:

The property has been identified in an area that might have been used for mining other than coal in the past.

Next Steps

As the property has been identified in an area that may have been used for mining you may want to consult a local RICS accredited surveyor and/or review any available geotechnical surveys. Further information may be available from the Minerals and Waste Officer at the County Council and the Local Building Controls Officer.

Brine Extraction and Salt Mining

Professional Opinion

Landmark Information have not identified any areas of former brine pumping or salt mining at the property.

Next Steps

None Required.

Landfill Sites and Infilled Ground

Professional Opinion

Landmark Information have not identified any areas of landfill or other infilled ground at the property.

Next Steps

None Required.

Professional Opinion and Next Steps

Natural Ground Stability Hazards

IDENTIFIED

Professional Opinion

Landmark Information have identified natural ground stability hazards at or close to the site.

There are very significant soluble rocks in the area. Information provided by the BGS indicates there are places where the underlying ground may have dissolved and/or there is considerable recorded subsidence. There is a high potential of localised subsidence occurring naturally.

Next Steps

The property is in an area where natural ground instability hazards could occur. If any active ground instability appears to be affecting your property, inform your insurance company, mortgage lender, landlord or get specialist advice from a suitably qualified expert such as a structural surveyor, geotechnical engineer or chartered engineering geologist. If active ground instability does not appear to be affecting your property but the area has a potential for instability, this should be taken into account before undertaking any alterations to the existing property.

Coal Mining Subsidence Damage Claims

Professional Opinion

Landmark Information have not identified any damage claims on-site or within 50m of the property that have been handled by the Coal Authority.

Next Steps

None Required.

Insurance Claims from Subsidence

Professional Opinion

Landmark Information have not identified any insurance claims in the area that could indicate that there is a risk of subsidence.

Next Steps

None Required.

Property Location

Location Plan

The map below shows the location of the property.

Property Purchaser Guide

Understanding this report

The purpose of this report is to highlight any potential mining and subsidence hazards in your area. The presence of a hazard could mean that your property is at risk of structural damage from subsidence or heave.

We will state 'NONE IDENTIFIED' on the front page if no hazards have been identified. If we do identify a potential hazard we will state 'IDENTIFIED'. Further guidance about each hazard can be found in the Professional Opinion and Next Steps section as well as throughout the main body of the report.

Former Mining

We search a number of different sources of information to identify areas of past mining. Old mine shafts and tunnels can collapse and damage properties above them. Disturbed ground and spoil tips can also be prone to settlement which could cause structural damage to buildings.

Former Brine Extraction and Salt Mining

We identify areas of historical salt and brine extractions. This type of mining leaves large cavities in the ground which could collapse and cause problems for properties built in the area.

Landfill Sites and Infilled Ground

We identify areas formerly used for landfill and areas of other infilling indicated from historical mapping such as ponds, drains and small pits. Infilled land can be susceptible to settling so any houses that have been built on these areas could experience ground stability problems and subsidence resulting in damage to your property.

Natural Ground Stability Hazards

We identify areas of land that could be prone to ground instability and subsidence as a result of the natural underlying geology. Examples include areas of the UK at a higher risk of landslides or where sink holes could occur.

Insurance Claims from Subsidence

We look at the ratio of valid insurance claims there are in your postcode compared with the rest of Great Britain. Based on this, we will indicate if there is a very high, high, moderate to high or moderate risk of subsidence in the area. We also report on Coal Mining Subsidence Damage Claims. These are claims that have been handled by the Coal Authority.

Note: If no features have been found in a section we will not display a map or data table for that section.

Ground Hazards

Former Mining

The map below shows the locations of any areas of potential former mining. We detail the information we believe requires further attention in the tables on the following page and also in the Professional Opinion and Next Steps section.

Contains Ordnance Survey data © Crown copyright and database right 2020.

Ground Hazards

Former Mining

The tables below present the findings of all the data that has been searched as part of this section of the assessment.

Question	Response
Is the property within an area where a full coal mining report should be obtained?	No

Question	Response
Is the property within an area where historical mapping indicates that mining activities have taken place?	No

Question	Response
Are there any mineral extraction sites as recorded by the British Geological Survey?	Yes

Map ID	Details	Distance	Contact
BGS Recorded Mineral Sites			
1	Name: Pear Tree Knap Gravel Pit Type: Opencast Periodic Type: Quaternary Geology: Head Commodity: Sand and Gravel Location: Boxgrove, Chichester, West Sussex Status: Ceased Reference: 157598 Positional Accuracy: Located by supplier to within 10m	93m	1

Question	Response
Is the property within an area where there has been recorded mining activity?	No

Question	Response
Are there any Man-Made Cavities identified within 250m of the property?	No

Question	Response
Is the property identified in an area where there is the potential for mining to have happened in the past?	No

Question	Response
Is the property within an area where there has been mining activities other than coal mining?	No

What are the potential impacts on my property?

Former mining operations, depending on the method of mining used, have the potential to cause ground instability issues from the collapse of old mine shafts and tunnels. Areas of mining spoil or infilling may also be prone to settling which could result in subsidence.

Ground Hazards

Natural Ground Stability Hazards

The map below shows the areas where there is the potential for natural ground stability hazards. We detail the information we believe requires further attention in the tables on the following page and also in the Professional Opinion and Next Steps section.

Contains Ordnance Survey data © Crown copyright and database right 2020.

Multiple Features Present

BGS Geosure High

BGS Geosure Moderate

Natural Cavities

Ground Hazards

Natural Ground Stability Hazards

The tables below present the findings of all the data that has been searched as part of this section of the assessment.

Question	Response
What is the potential for collapsible ground instability at or close to the property?	Very Low

Question	Response
What is the potential for compressible ground instability at or close to the property?	None

Question	Response
What is the potential for ground dissolution instability at or close to the property?	High

Map ID	Details	Distance	Contact
Potential for Ground Dissolution Stability Hazards			
2	<p>Hazard Potential: High</p> <p>Hazard Description: Very significant soluble rocks, where there are numerous dissolution features and/or considerable recorded subsidence with high possibility of localised subsidence occurring naturally or in adverse conditions such as high surface or subsurface water flow.</p> <p>Hazard Guidance: Consider obtaining specialist advice to advise on need for stabilisation work and/or land management plan to maintain stability. Do not dispose of surface drainage into the ground. Maintain drainage infrastructure.</p>	On Site	1

What are the potential impacts on my property?

Ground dissolution occurs when certain types of bedrock contain layers of material that can dissolve within the groundwater. This can cause underground cavities to develop that, with time, can reach the surface and cause significant ground movement, such as development of collapse hollows that can directly damage buildings. In these areas you should consider obtaining specialist advice to advise on need for stabilisation work and/or land management plan to maintain stability. Do not dispose of surface drainage into the ground.

Question	Response
What is the potential for landslide instability at or close to the property?	Very Low

Question	Response
What is the potential for running sand ground instability at or close to the property?	None

Question	Response
What is the potential for shrinking or swelling clay ground instability at or close to the property?	None

Question	Response
Are there any natural cavities identified within 250m of the property?	No

Insurance Claims

Insurance Claims from Subsidence

There is no map associated with this section. The tables below present the findings of all the data that has been searched as part of this section of the assessment.

Question	Response
What is the subsidence risk rating based on the ratio of valid subsidence claims history of your postcode compared with the rest of Great Britain?	No Claims

What do the risk ratings mean?

The risk ranking represents the ratio of valid subsidence claims located in a postcode expressed as a percentage of the total number of properties found within that postcode as compared to the rest of Great Britain.

Where a notified subsidence claim has been repudiated it is not considered as a valid subsidence claim so is not included in the risk ranking calculation. The analysis is sourced from Crawford and Company Ltd.

Very High: The risk rank of this postcode is within the top 25% of all postcodes that have a recorded history of valid subsidence claims.

High: The risk rank of this postcode falls between 50% and 75% of all postcodes that have a recorded history of valid subsidence claims.

Moderate to High: The risk rank of this postcode falls between 25% and 50% of all postcodes that have a recorded history of valid subsidence claims.

Moderate: The risk rank of this postcode is within the lowest 25% of all postcodes that have a recorded history of valid subsidence claims.

No Claims: No valid subsidence claims have been recorded against this postcode.
