

Homecheck Professional Environment

Homecheck Environmental highlights the risk of contaminated land at the property, as well as a high level indication of other possible environmental risks, including flood, ground stability and radon. Meets the needs of the Law Society Practice note and Part 2A of the Environment Protection Act 1990.

What's included

Front page risk summary

Consultant's professional opinion

Contaminated land risk assessment

Flood screening

Ground stability data

Contaminated land excess free remediation contribution

PI cover of £10 million
Subject to terms and conditions

Free 'Further Action' risk re-review service

Key features

- Easy to interpret report with summary front page
 - Professional opinion and recommendations
- Best available data from industry experts, such as the Environment Agency, JBA Consulting, as well as Landmark's unique and extensive data holding built up over many years by our in-house data and environmental experts

Designed for:

Residential property transactions

Use this report to understand:

- Environmental risks, including:
 - Contaminated land assessment
 - Flood screen
 - Ground stability screen
 - Radon
 - Environmental constraints

Why you need it:

Highlights if there is a risk of contaminated land and identifies other environmental factors at or around the property; satisfying your environmental due diligence.

£100k Excess-free Remediation Contribution*

£10m Professional Indemnity Cover of £10million*

* Subject to terms and conditions

Expert professional opinion included

Every Homecheck Professional Environmental Report includes an accredited risk assessment from Argyll, Landmark's environmental consultancy, indicating the risk of the property being designated as contaminated land, as defined by Part 2A of the Environmental Protection Act 1990.

Free 'Further Action' report review

Where the client is able to provide Landmark with sufficient further information, the report will be re-reviewed at no extra cost. If the client provides information which mitigates the cause of the original result, a new 'Passed' result will be issued. This service is available free of charge when the customer provides the required information. Alternatively, we can procure the information on behalf of the client; in these situations charges will apply.

Examples of Landmark's unique data

- Landmark's historical land use data is used by over 350 Local Authorities, so you can be assured that you are benefiting from the same data that most LA's are using for their own Part 2A strategies.
- Landmark's Risk Assessed Land Register is a continually updated database of properties deemed as unlikely to be designated as contaminated land – greatly improving the efficiency of transactions and reducing the need for 'Further Action' reports.

Contaminated land insurance

Contaminated Land Insurance is available to purchase via Landmark Information Group. This insurance provides £2M cover and protects a seller and a new purchaser for 15 years as standard, and protects a lender for the full term of their mortgage. Insurance can be purchased at the time as obtaining a Landmark Environmental Report and can also be purchased afterwards, if a Further Action Environmental Report has been received.

These other residential reports may be relevant to your site:

Energy and Infrastructure

Obtain details of a number of selected Energy and Infrastructure projects across the UK and make sure you are fully informed about the potential impacts. Our report can help by informing if the site is likely to be impacted by development projects.

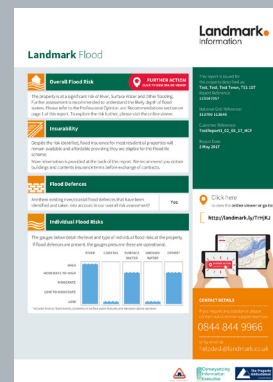

Included in the report:

Wind farms, HS2, Crossrail, energy exploration e.g. fracking, solar farms and renewable power plants.

Landmark Flood

A comprehensive desktop analysis of flood risk, taking into account flood defences and the availability of insurance. It comes complete with an online map viewer to examine risks further and meets the needs of the Law Society Flood Risk Practice Note.

Included in the report:

Flood information covering risks from river, coastal, groundwater, surface water and other sources.

Landmark Planning

Comprehensive Planning Report with a clearer view

Landmark Planning provides you with unrivaled data accuracy, including large applications as polygons for large parts of the UK. Our unique polygon data provides an accurate representation of a developments potential impact for easy analysis and communication.

Use this report to understand:

- Whether there are nearby residential planning applications that may impact the property. These are divided into:
 - Alterations and minor
 - New builds up to 50 dwellings
 - New builds over 50 dwellings
 - Unclassified
- What small, medium and large non-residential developments are proposed or are currently being carried out in the area
- What future uses of land are being proposed for the surrounding area
- Local authority policies and constraints
- Neighbourhood information including housing, demographics, schools, local amenities and rights of way

Key features

- Clear front page summary showing the type, vicinity and number of applications near the property
- Easily interpreted planning application information with maps
- Simple guidance to understanding the planning application and development process
- Large aerial photograph
- Turnaround time of one working day
- Comprehensive Landmark terms and conditions

What's included:

- Residential Planning Applications
- Non-residential Planning Applications
- Local Plans
- Land Use Designations
- Rights of Way
- Housing and Demographics
- Education
- Amenities
- 7 year history of planning applications
- **NEW** Polygon Data for Large Applications

New enhanced data

A key and unique feature within Landmark planning is how we display data on the majority of the UK's large planning applications as polygons.

Polygons provide a realistic understanding of the potential impact, both positive and negative, of a development, meaning a much clearer view of planning detail for both conveyancer and client.

The report also provides a fuller picture of the neighbourhood.

When do I need this report?

Traditionally solicitors have carried out two types of enquiries to find out about planning issues:

- A local authority search, which provides information that is generally limited to the extent of the subject property
- A Property Information Form, which relies on the knowledge of the seller

The Landmark Planning report is designed to supplement the findings of the local authority search by also looking at development activity in the wider area.

Designed specifically for residential buyers and their solicitors, the Landmark Planning report will provide key information so that clients can make informed decisions on the impact, if any,

a development may have on the value or enjoyment of the property in the future.

Due diligence

As part of your due diligence, ordering a Landmark Planning report demonstrates you have undertaken all practicable steps to reasonably identify information that the client would want to know.

Wide reliance

Automatic reliance by most parties involved in a property transaction including seller, buyer, lender and their professional advisors.

Landmark is the UK's market leader in the provision of environmental search reports. With our best-in-class data and risk models supported by an experienced and knowledgeable team, Landmark reports ensure complete due diligence providing key results for clients to make informed decisions, and smoother, quicker conveyancing transactions. **Understanding the past, supporting the present, leading the future.**
